HOW TO MAKE A DAWN FROM COCOON PAPER FINGER PUPPET

The PLAN is...

Turn your pointer finger into a caterpillar by adding eyes, mouth, body and legs using a pen.

Colour in your wings and cocoon.

Fold template along both fold lines.

Cut along dotted lines around the cocoon and wings.

Make slits to put your finger (now a caterpillar) through by cutting from folded edge.

Sticky tape your folded cocoon to the back of the wing.

Fold the wings so they are wrapped around your finger with the cocoon at the front.

TA DA! You're a moth!
